ABOUT ME

Experienced Frontend Developer with a strong track record of delivering engaging digital experiences and supporting research-driven projects. With over a year of experience, I specialize in building responsive, user-centered web applications using HTML, CSS, JavaScript, TypeScript, React, Next.js, and modern frameworks. I have a keen eye for UI/UX principles, ensuring visually appealing and functional designs. Known for my attention to detail, adaptability, and collaborative mindset, I thrive in dynamic environments, working closely with teams and clients to bring ideas to life. Passionate about innovation and continuous learning, I stay updated on industry trends to enhance user experiences and optimize performance. Outside of coding, I enjoy graphic design as a creative outlet, exploring typography, color theory, and layout principles.

EDUCATION

- UNIVERSITY OF JOS, NIGERIA | 2016 - 2021
Bachelor of Science (BSc) in Building
- ST. JOHN'S COLLEGE, JOS, NIGERIA | 2010 - 2016
Senior Secondary School Certification
- GLORIOUS CHILD ACADEMY, JOS, NIGERIA | 2004 - 2010
Primary School Leaving Certificate

COMPETENCES AND SKILL SET

- Frontend Development: 3+ years of experience in building responsive and dynamic web applications.
- Technologies: HTML, CSS, Tailwind CSS, JavaScript, TypeScript, React.js, Next.js, Linux, Git, Prisma, PostgreSQL.
- Version Control & Deployment: Proficient in Git for managing code, deploying projects, and collaborating in teams.

- UI/UX & Performance: Implement user-friendly interfaces, optimize accessibility, and enhance performance across devices.
 - Technical Troubleshooting: Experience in setting up virtual machines, installing/troubleshooting Windows & Linux OS.
 - Soft Skills: Strong problem-solving ability, effective communication, teamwork, and leadership.
- Languages: Fluent in English and Hausa (written & spoken).

CAREER EXPERIENCES

O'range Development consult | April 2025 – Present

Junior QA Engineer

- Testing, testing, and more testing.
- Collaborated with developers to verify fixes and ensure release quality.
- Maintained test cases and contributed to product improvement during sprints.
- Using Git and GitHub for version control and collaboration.
- Reviewed features from a user's perspective to catch usability issues.

Belsoft Systems | Dec 2024 – Present

Frontend Developer

- Build responsive and dynamic web applications.
- Work closely with designers and backend developers to implement UI/UX.
- Optimize website performance and accessibility.
- Using Git and GitHub for version control and collaboration.
- Writing clean, maintainable code with clear documentation.
- Integrating RESTFUL APIs into frontend applications.

UMYU Community School, Batagarawa LGA, Katsina State (NYSC) | April 2024 - March 2025

Teacher – Basic Technology

- Develop and implement engaging lessons aligned with the school's curriculum.
- Foster a safe, inclusive, and interactive learning environment.
- Support cognitive, language, and motor skill development through hands-on activities.
- Assess student progress and provide feedback to parents.

- Collaborate with staff to enhance learning experiences.
- Ensure student safety and well-being while promoting holistic growth.

Stems Multi-Global Engineering and Services Ltd. | May 2021- December 2021

Construction Management Intern

- Support in overseeing and direct construction projects from conception to completion.
- Oversee all onsite and offsite constructions to monitor compliance with building and safety regulations.
- Select tools, materials and equipment and track inventory.
- Analyze, manage, and mitigate risks.
- Prepare internal and external reports pertaining Job status.

PROJECTS

NYSC CDS Attendance System

A web-based system for tracking attendance in NYSC Community Development Service (CDS) meetings.

Tools Used: TypeScript, Next.js, Tailwind CSS, Prisma, PostgreSQL.

- Developed a user-friendly interface for easy attendance marking.
- Implemented authentication for secure access.
- Integrated a database to store and retrieve attendance records.

Project link: <https://cds-attendance-system.vercel.app>

GRIND & GLORY

An e-commerce clothing brand with an admin dashboard for managing products, orders, and customers.

Tools Used: Next.js, TypeScript, Prisma, PostgreSQL, Tailwind CSS, React Context API.

- Designed and built a responsive customer and admin dashboard.
- Implemented product management features, including stock tracking.
- Integrated authentication and user role management.

Project link: <https://grind-and-glory.vercel.app>

TRAINING / CERTIFICATIONS

- IT Essentials (2022)
- CyberOps Associate (2023)
- Introduction to Cybersecurity (2023)
- Cybersecurity Essentials (2023)
- Graphic Design training (Three Months with Regalo Hope Foundation) (2023)
- Code Plateau (Software Engineering) (2023)
- JavaScript Essentials 1 (2024)
- 3MTT Nigeria (Software Engineering) (2024)

PROFESSIONAL MEMBERSHIP

- Graduate, Nigerian Institute of Building (GNIOB)
